

# I am Doruk Dorkodu

---

## About

- Vefa'151
- Founder and Chief of Dorkodu - @dorkodu
- Self-taught Software Engineer
- Freewheeling, Thinker, Protagonist, High School Kid, Design and Experience Geek

Web : [Dorkodu - dorkodu.com](http://Dorkodu - dorkodu.com)

Email : [doruk@dorkodu.com](mailto:doruk@dorkodu.com)

Twitter : [@dorkodu](https://twitter.com/dorkodu)

## Life Purpose

I want to change the world and human race's destiny. Literally.

I want to give people something they can live up to, a better life opportunity for everyone.

I want to do this by creating new products for humanity, inventing something new, real, useful, meaningful.

I will NOT do that for the sake of capitalism.

But to push the limits of human civilization forward and give everyone a better and life

## Life Goals - simplified

### Universal Knowledge Resource

- Create a "social knowledge network" to understand how people express, create, exchange and perceive knowledge. It will be like a virtual - artificial experimentation medium.
- Create a universal "standard" or "protocol" on what knowledge is, and how we exchange/acquire it.
- Create "Universal Knowledge Resource" using that protocol
- Create a "Knowledge Search Engine" to give people a way to get pure information from that resource
- Create a "P2P Knowledge Exchange Protocol"

- Create Internet of Brains, in which people or machines can connect and exchange information using that protocol

**Clean and Drinkable Water Purification and Production Way**

**Better, Renewable, Green, Free Energy Resource**

**An Automated and Cheaper Way to Natural, More Productive, Efficient Agriculture**

**A Way to Cheaper Space Mining and Exploration**

## What I have been doing in Software Engineering?

- **Wanderlyf** : the social knowledge network
- **Outsights** : a simple, minimalistic and intuitive PHP web framework
- **QuoteRL** : a new approach to data retrieval and API design
- **Lucid Approach** : yet another simplest approach to building awesome UX apps
- **Lucid** : a simple and lightweight JavaScript library for developing component-based web apps
- **Luckt** : a public state management library & pattern for Lucid apps
- **Lumberjack** : a JavaScript library for efficient data retrieval using QuoteRL
- **Loom** : a minimalistic dependency utility for PHP
- **Hindsight** : a utility that makes it simple to develop, maintain and deploy a Markdown based site.

## What languages do I write?

- C, PHP, JavaScript, HTML + CSS

## Inspired From

- **The Leader** : **Mustafa Kemal Atatürk** and Turkish Independence Movement
- **Entrepreneurs** : **Steve Jobs, Elon Musk, Richard Branson, Chris Gardner**
- **Activists** : Martin Luther King, Muhammed Ali, Linus Torvalds, Richard Stallman
- **Cult Movies** : Forrest Gump, Pursuit of Happiness, Shawsank Redemption, The Godfather, The Matrix, The Green Mile, October Sky

## Music

- **Anatolian Rock, Folk Rock, Blues Rock, Psychedelic Rock, Soft Rock**
- Especially : **Bob Dylan, Jimi Hendrix, Led Zeppelin, The Beatles, Cem Karaca, Erkin Koray, Imagine Dragons, Nirvana, Queen, Toad the Wet Sprocket**

## Books

- Hitchhikers Guide to the Galaxy
- The Alchemist
- 1984
- Five Equalities That Changed The World
- You Don't Have To Born Brilliant
- The Little Prince
- Kürk Mantolu Madonna
- Nutuk

## What languages do I speak?

- Turkish
- American English
- German (just a little)
